Hot water: Central heating boiler

Boiler fuel: Gas

Cadastral municipality: Gouda

Ownership: Full ownership

Facilities

Parking facilities: Paid parking, parking permits

Garage types: No garage

Description

Located in a central area of Gouda, this surprisingly spacious maisonette apartment offers a playful layout, abundant natural light and a pleasant rooftop terrace. The property provides an excellent foundation for buyers who wish to realize their own living preferences, while several important elements have already been thoroughly renovated in recent years.

The property is part of an active Homeowners' Association (VvE). The association has available, among other things, meeting minutes, annual financial statements, budgets and a long-term maintenance plan (MJOP). According to the current planning, no major maintenance costs are expected over the next 10 to 15 years, providing clarity and stability for the future owner.

A major advantage of this property is the fully renovated and insulated roof, which was renewed in early 2025. During these works, the dormer and roof windows were also upgraded, contributing not only to additional living comfort but also to the sustainability of the property. The interior and exterior paintwork (including window frames and balcony railings) was renewed again in the spring of 2026.

The living floor features a spacious living room with a playful layout and plenty of natural light. Adjacent to the living room is the kitchen with access to the terrace. The toilet can be reached via the landing.

Both the kitchen and bathroom are simply finished, but precisely because of this they offer an excellent opportunity to modernize them entirely according to your own taste with relatively limited effort and budget. A charming detail worth mentioning are the authentic tiles in the bathroom, which can also be found on the floor near the entrance.

On the upper floor you will find a spacious bedroom, the bathroom and a second room that can only be accessed through the main bedroom. This room could ideally serve as a walk-in closet, nursery or home office. The bedroom features a characteristic layout beneath the roof construction.

Technically, the property has also been well maintained. The central heating boiler is a Remeha HR 28c from 2022 and has been periodically serviced, with the latest maintenance carried out in April 2026. The boiler is located on the landing of the second floor and neatly concealed in a separate cupboard space.

The property currently has energy label D.

An ideal property for first-time buyers or those looking to move up the property ladder who are searching for space, character and the opportunity to finish the home entirely to their own taste.
